PROFESSIONAL PROFILE

Cyber Security undergraduate at Nigerian Army University, Biu, developing a focused professional specialisation in **digital forensics**. Building practical knowledge of digital evidence acquisition, preservation, examination and analysis, including metadata examination, file recovery, digital artefact analysis, network traffic inspection and forensic documentation. Committed to accuracy, evidence integrity, confidentiality, repeatable methodology and clear technical reporting.

EDUCATION

B.Sc. Cyber Security — Nigerian Army University, Biu

Expected graduation: 2028

TECHNICAL SKILLS

Digital Forensics: Autopsy; basic FTK Imager; ExifTool; metadata examination; file recovery; digital artefact examination; introductory forensic workflows.

Network Forensics: Wireshark; packet inspection; network traffic examination.

Scripting and Data Handling: Basic Python scripting; log filtering; hash verification; data parsing.

Forensic Documentation and Practice: Evidence reporting; introductory chain-of-custody procedures; research and technical documentation.

PROJECTS AND PRACTICAL WORK

Digital Forensics Practical Exercises

- Practised file recovery, metadata examination and digital artefact analysis using Autopsy.
- Used Wireshark in laboratory exercises to inspect network packets and examine traffic patterns.
- Applied basic Python scripts to log filtering, hash verification and data parsing.

DFLAB — Digital Forensics Laboratory

- Developing a digital forensics laboratory initiative focused on laboratory infrastructure, hardware architecture, storage strategy, evidence-handling requirements and deployment planning.
- Current documentation covers proposed architecture and requirements. Procurement, deployment and validation are separate stages and are not represented as completed.

TRAINING, CERTIFICATIONS AND CTF PARTICIPATION

- **2026 Null Origin CTF** — CYBERHX, September 2026 (CTF participation).
- **Cybersecurity & Personal Development** — ArtificialX Tech. Ltd, November 2025.
- **Cybersecurity Awareness** — Cybersecurity Awareness Day, October 2025.
- **HOLMES CTF 2025** — Hack The Box, September 2025 (CTF participation).
- **CrowdSec Threat Intelligence Course** — CrowdSec Academy, July 2025.
- **Introduction to Cybersecurity** — Cisco Networking Academy, July 2025.
- **Introduction to Cybersecurity** — Great Learning Academy, August 2024.
- **Community-Driven Cybersecurity Course** — CrowdSec Academy, July 2023.

CORE PROFESSIONAL ATTRIBUTES

Analytical thinking; attention to detail; integrity and discretion; methodical problem-solving; research ability; willingness to learn; clear communication; and technical documentation.

DIGITAL FORENSICS INTERESTS

Computer and disk forensics; file-system analysis; digital artefact examination; metadata and file analysis; network forensics; memory forensics; digital evidence preservation and integrity; forensic laboratory development; and forensic research.
